DIVISION OF
OIL GAS & MINING

Dear Mr. Shajary:

We have received and reviewed your plan amendment to the Plan of Operations for the San Rafael Gypsum Mine in Emery County, Utah and we have found the amendment to be incomplete.

We need further details on the following items:

1. The size and extent of the proposed new mine areas need to be included.
2. The location of the roads also need to be included. Also required is a written description and location of the dry wash and fence crossings.
3. You may want to consider using the access into the western mine area as drainage into the dry wash. If you plan on draining the west mine area by using the access road, then the road should be pointed downstream where it enters the dry wash, not upstream.
4. The location of topsoil and cryptogamic soil stockpiles need to be included.

Please note that the case file on your Plan of Operations has been serialized. The serial number for the plan is UTU-69850.

If you have any questions, please feel free to contact Neil Simmons of my staff at 801-637-4584.

Sincerely yours,

PENELOPE J. SMALLEY

Area Manager
